Joint Online Symposium on Rheology May 3-4, 2022

A joint symposium on rheology is organized as a merger of the annual meetings of the DGK, DRG and the ProcessNet Subject Division "Rheology." The conference targets rheological phenomena in all their aspects and covers theoretical and experimental studies as well as technological applications. Following sessions are planned:

- ▶ Rheology of structured fluids
- ▶ Role of thermal and rheological properties in processing of complex fluids: Measuring, modeling & interpreting
- ▶ Rheology for applications: From adhesives to additive manufacturing
- ▶ Session for young researchers: Current trends in rheology

Contributions from both academia and industry are welcome in order to touch flow phenomena of a wide variety of complex fluids. In particular, young rheologists are encouraged to present their work and share their findings with the rheological community. Lectures can be presented in German or English, while slides and abstracts should be prepared in English.

Abstracts should be compiled using the available template from the website below and sent to christina.frey@dgk-ev.de. Deadline: February, 28th 2022.
